ABOUT ME

Full-Stack Web Developer with a strong focus on building balanced end-to-end web applications. Gained valuable international experience during an internship at Aarhus University, working with PHP, JavaScript, and PostgreSQL. Passionate about crafting intuitive front-end interfaces, developing efficient back-end logic, and streamlining development workflows using Git, Docker, and Linux.

French **A2**

EXPERIENCE

Aarhus University

Denmark · 01/03/2026 – 01/06/2026

Developed and maintained a comprehensive telescope control platform using PHP, JavaScript, and PostgreSQL to optimize user management, observation scheduling, and the handling of large-scale scientific data. Automated critical workflows for the calibration and analysis of FITS scientific images, effectively resolving technical discrepancies between hardware coordinates and astronomical databases to ensure high data integrity.

STUDIES

Higher Technician in Web Application Development
